

SERIES HM 6

Automatic Stapling Machine for flat and saddle stapling

The little all-rounder among STAGO staplers is ideal for professional use in offices, law firms, schools, government agencies and copy shops. The HM 6 is characterised by its ease of use. The conversion of the stop table between the flat stapler and saddle stapler takes a few steps and is quickly and easily possible even for inexperienced users. Freely adjustable stops ensure an accurate, repeatable stapling position. For a perfect stapling result without annoying marks, the stapling force can be finely adjusted via a dial.

For longer runs, the HM 6/2 model with twin stapling heads and a fixed staple clearance of 80 mm is suitable (binder dimension). Perfect for booklet making with loop staples in one working step.

Customised solutions can also be implemented inexpensively on the basis of the HM 6.

- fast and easy conversion between flat and saddle stapling
- with one or two stapling heads available
- ready for paper size up to DIN A3 and stapling height up to 6 mm
- precisely adjustable stops
- processing of loop staples
- designed for continuous use, economically even for small pads
- easily loaded with staples from the front
