binding covers

### RECOsystems RECO THERM TB 4

#### Thermo binder for thermal binding covers

The RECOsystems RECO THERM TB 4 is a perfect thermal binding machine for copyshop or office use. If you need to produce presentations, records, offers or something similar - this is probably one of the easiest and fastest ways. Just place the paper in the thermal binding cover with the right size. Put the cover in the machine - and after 1-2 Minutes and some cooling down time the binding is finished. What makes this machine so special is the vibrating program which starts at the end of the binding procedure.

Because of this vibrating program the paper sticks much better to the glue and you have a better binding result.

#### technical specifications:

- for DIN A4 thermal binding maps
- max. binding capacity: 400 sheets
- binding time: approx. 1-2 minutes depending on book thickness
- vibrating system for a better binding result
- cooling fans to accelerate to cooling down process
- 230V, 50 Hz
- weight: 6,6 / 5,9 kg
- dimensions: 540x215x260 mm / 470x270x220 mm \*

\*packing size/machine size (width x depth x height)
