

SERIES H 18

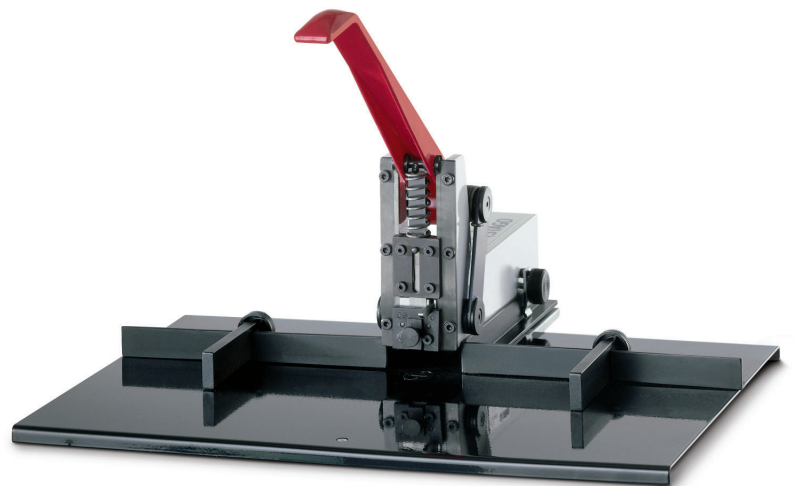

Manually operated stapling machine

Made to last. Robust manual stapling machine for short runs and special requirements.

The H 18T, a robust flat stapler for all daily tasks. Special support table with freely adjustable stops for precise stapling positions. Up to 180 sheets (80g plain paper) stapling capacity and perfect stapling results via the use of professional staples.

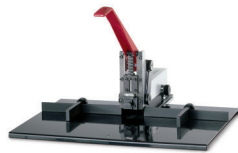

An extreme throat depth is no problem for the HM 18BSS model. With a throat depth of up to 300 mm with a stapling capacity of up to 18 mm (80g), unusual requirements are not a challenge. The manual free-standing stapler masters flat and saddle stapling. The modification of the support table is possible with just a few simple hand movements. The operation is ergonomically designed with a foot pedal.

- robust construction
- support table with freely adjustable stops
- paper size up to DIN A3 and stapling capacity up to 18mm (80g)
- huge throat depth up to 300mm
- staple loading from the front
